Dear Ruth,

In your email to me on Dec. 17, 2002, you mentioned that you would work on a list of comments on areas where we feel there are changes required. Do you need any further input from us here for this? As you know we had a number of concerns, e.g., regarding the language related to the objectives of the TES and the definitions of reduced exposure or *reduced risk products* and *harm reduction*.

Best regards,  
Roger
